

Ecohomes & BREEAM

We offer a full range of services for Ecohomes and BREEAM based requirements including planning pre-assessment reports, pre-assessment estimation and design / post construction stage assessments up to issue of certificates.

We can also offer an extensive and detailed consultancy service on aspects of Ecohomes and BREEAM to analyse and find solutions to specific assessments. We offer advice and guidance on where credits can be achieved by an efficient and low cost means. Our licensed assessors can undertake assessments, offer accredited advice and also become involved with design teams to guide members not familiar with assessment methods.

Our Ecohomes and BREEAM services are tailored around the requirements of your site, enabling us to offer highly competitive prices.

Our service includes:

- **Full Ecohomes Rating** - A fully licensed Ecohomes Assessment completed on your project performance at a “pass” to “excellent” standard.
- **Ecohomes Review Assessment** - A complete assessment without the formal BRE certification.
- **Ecohomes Design Advice** - Design advice is offered to ensure that all options are considered from concept to build stage.
- **Post Construction Review** - A full review can be offered to ensure that the design advice has been implemented with complete accuracy.
- **General Guidance** - A desktop study, working from development documents can be given to take the potentially detailed study forward in a simple but effective manner.
